1 9 Jis Z Hilti

(A) in the picture above shows the difference in the way screws are marked, though not all the JIS screws are marked with such dot (1). (B) shows how Phillips has a very slight curve (2) - not really visible to the naked eye (exaggerated in the drawing), but it makes the difference when force is applied, "helping" the screwdriver slip out ...

Phillips, JIS, and Pozidriv screwdrivers explained ...

A screwdriver is a tool, manual or powered, used for driving screws.A

typical simple screwdriver has a handle and a shaft, ending in a tip the user puts into the screw head before turning the handle. This form of the screwdriver has been replaced in many workplaces and homes with a more modern and versatile tool, a power drill, as they are quicker, easier, and also can drill holes.
