The Handbook of Non-Drug interventions (HANDI) is making effective non-drug treatments more visible and easier to use. HANDI aims to make 'prescribing' a non-drug therapy almost as easy as writing a prescription. The topics in HANDI have been developed by the HANDI Project team and is supported by appropriate evidence.

RACGP - Handbook of Non-Drug Interventions (HANDI)

Urinalysis (urine test, drug test) is a test performed on a patient's urine sample to diagnose conditions and diseases such as urinary tract infection, kidney infection, kidney stones, inflammation of the kidneys, or screen for progression of conditions such as diabetes and high blood pressure.

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels of prescription ...

Nursing - Wikipedia

BIAS, the multifaceted negative evaluation of one group and its members relative to another, can be manifested directly or indirectly. Studies have shown that physicians may recommend more advanced and effective medical treatments for White patients than for Black patients.¹ This is an example of direct bias. Ethnic disparities have been shown to be more pronounced when treatment guidelines ...
