Reciprocity. It is a fundamental property of antennas that the receiving pattern

## Acces PDF Balanis Antenna Theory 2nd Edition Solutions

(sensitivity as a function of direction) of an antenna when used for receiving is identical to the far-field radiation pattern of the antenna when used for transmitting. This is a consequence of the reciprocity theorem of electromagnetics and is proved below. Therefore, in discussions of radiation patterns the ...

## **Radiation pattern - Wikipedia**

For antennas shorter than half of the wavelength of the radiation they emit (i.e., electromagnetically "short" antennas), the far and near regional boundaries are measured in terms of a simple ratio of the distance  $r$  from the radiating source to the wavelength  $\lambda$  of

# Acces PDF Balanis Antenna Theory 2nd Edition Solutions

the radiation. For such an antenna, the near field is the region within a radius  $r \ll \lambda$ , while the far-field is the region for ...
