### 9th Grade Biology: Inheritance Patterns and Human Genetics

Mendel identified the rules of particulate inheritance (inheritance based on genes) using pea plants which have many single-gene traits with a dominant/recessive inheritance pattern. This is the simplest inheritance pattern possible, and most traits are NOT controlled this way. Other (more common) inheritance patterns include:

### Patterns of inheritance | Biological Principles

Answer: There are two major types of inheritances, namely, Mendelian and non-Mendelian inheritances. In the Mendelian type of Inheritance, the traits of the parents are passed down to their offspring by alleles of one gene that is either dominant or recessive.
