Abstract: In the common rail system, fuel is distributed to the injectors from a high pressure accumulator, called the rail. The rail is fed by a high pressure fuel pump. The pressure in the rail, as well as the start and end of the signal that activates the injector for each cylinder are electronically controlled.

### **Ford - Tractor Parts Direct**

Common rail direct fuel injection is a direct fuel injection system built around a high-pressure (over 2,000 bar or 200 MPa or 29,000 psi) fuel rail feeding solenoid valves, as opposed to a low-pressure fuel pump feeding unit injectors (or pump nozzles). High-pressure injection delivers power and fuel consumption benefits over earlier lower pressure fuel injection, [citation needed] by ...

Car and Truck Fuel Injectors. First used to replace the carburetor in the 1980s as a means of delivering gasoline to the engine, the fuel injection system is an important component in most diesel and petrol vehicles. These parts will help you replace or upgrade the fuel injector in your car or truck. How does the fuel injector work?
