Oils And Fats In The

Fats and oils that are in contact with moist air at room temperature eventually undergo oxidation and hydrolysis reactions that cause them to turn rancid, acquiring a characteristic disagreeable odor. One cause of the odor is the release of volatile fatty acids by hydrolysis of the ester bonds. Butter, for example, releases foul-smelling ...

use canola oil when baking. Prepare fish, such as salmon and mackerel, instead of meat at least twice a week to get healthy omega-3 fatty acids. Bake or broil seafood instead of frying it. Choose lean meat and skinless poultry.

Dietary fats: Know which types to choose - Mayo Clinic

Oils and fats form an important part of a healthy diet. Structurally they are esters of glycerol with three fatty acids (called either triacylglycerols or triglycerides). It is these fatty acids that give the functionality to fats. Chemically, they can be divided into four main types - saturated, cis-monounsaturated, cis-polyunsaturated and trans fatty acids.

Oils and Fats | IFST

Stearic acid is a saturated fatty acid (with only single bonds) found in animal fats, and is the intended product in full hydrogenation. Oleic acid has a double bond (thus being "unsaturated") with cis geometry about midway in the chain; it

makes up 55-80% of olive oil.. Elaidic acid is its trans isomer; it may be present in partially hydrogenated vegetable oils, and also occurs in the fat ...

Fat - Wikipedia

Trans fats (also known as trans fatty acids) are actually worse than saturated fats. They are variants of unsaturated fats that have been altered during the manufacturing process to make fats and oils harden, (imagine what they're doing to our insides)!

Fats and oils - Better Health Channel - Home

Solid fats mainly come from animal foods and can also be made from vegetable oils through a process called hydrogenation. Solid fats contain more saturated fats and/or trans fats than oils. Saturated fats and trans fats tend to raise "bad" (LDL) cholesterol levels in the blood, which in turn increases the risk for heart disease.
